

Everything abides by the cosmic law which govern the universes. The creation, sustenance and annihilation follow the cosmic plan of God. Man, supposedly the most developed and intelligent creation of God, is given free will and is supposed to lay his own path. But in practice, he is paving his path to destruction and dismay. Man is the only being who is going away and disrupting the harmony of the creation of God.

Knowing this full well, we should strive to recreate harmony in the universe and follow the path of God. OM TAT SAT.

Sun won't fail to rise
Moon and Stars shine on night sky
Follow cosmic law

~Rama
